Key Points: Proposed Installation of approximately 155 linear feet of quarry stone sills, 80 linear feet of quarry stone rip rap revetment,and 3000 square feet, (150 cubic yards), of beach nourishment material. This is the 3rd extension requested from the applicant.The request came just a few days late because of an issue Mrs. Lieberum had in communicating with the County (her email was blocked). Once the issue was resolved the time had passed to get on the October agenda, (October WB had been canceled) and by the time the November WB meets the permit will have been expired for 2 days.
